

E-SERVICES & EDI

Intelligent procurement processes for more efficiency

Benefit from macle e-Services and optimize your procurement! Save time and money by using electronic interfaces and benefit from individual and flexible services.

We provide you with different classification and export formats, develop individual procurement interfaces according to your requirements and support you with the integration through flexible options for provision.

Price list & Article data

TXT, CSV or XML file with information such as article descriptions, short descriptions, EAN, delivery times, qualities, product groups, prices, availability information and more. This file can be individually adapted to your requirements and serves as a link to your ERP or shop system. Updated daily, you can receive the file on request via FTP, email or HTTP link. Hence, nothing stands in the way of integration.

Your benefits

- ✓ Expansion of your product range
- ✓ Constantly updated article data
- ✓ Price information according to your individual conditions

EDI ordering interface

On request, we will develop an electronic EDI connection with you. With the EDI connection, you can place orders directly in our ERP system and automatically receive further documents, such as delivery notes and invoices, and process them directly in your systems. Various standards, such as openTRANS 2.1, are possible. Classifications according to eCI@ss and further individual requirements can be integrated on request.

Your benefits

- ✓ Faster processing of transactions
- ✓ Cost savings through efficient processes
- ✓ Reduction of data entry errors
